2000°C CFC Fixtures

Advantages

- **High temperature resistance:** above **2000°C**
(vacuum / inert gas environment)
- **Lightweight:** lighter than metal materials & steel frames.
- **Larger loading capacity:** temperature ↑ strength ↑
- **Good chemical resistance:** no need for anti-corrosion protection.
- **High dimensional stability:** improve the distortion of heat-treated objects
- **Durability:** the service life can reach 10 years
- **Customized:** As customer drawings.

Applications:

- **Surface Carbonization Treatment**
- **Hardening Treatment**
- **For heat treatment in vacuum or oxygen-free and inert gas environment**
